SECRET

BENZ, George (George CHAVHAYADZE; George TORAYTCHAYADZ)

GULL

1.- On 27 July 1946, / met BENZ at Ravensburg. He continues to work for the French I.S. and stated that he has been appointed to Berlin as "Resident".

2.- BENZ showed many of his reports to GULL, most of which dealt with B recent trip into the Soviet occupied zone in the vicinity of Leipzig-Plauen-Berlin.

3.- Source states that Benz's reports impressed him as containing a great deal of deception material. Nevertheless, they contained interesting information on the location of well known Soviet Military personnel.

The O.B. information is somewhat fantastic, i.e. BENZ reports a concentration of 20,000 (sic) tanks north of Leipzig. His information all appears to have one chief point and that is that the Soviets will any day now attack the western allies. B reports that a continual stream of military trains are transporting the Red Army from the southwest to the northwest.

4.- GULL was requested to continue a surveillance of BENZ and the activities of his group.
